

Title:

CRITICAL PARTS CYCLE/OPERATING LIFE HOURS REPORTING

Aerojet Quality Note

C20

Rev #

Date

0

1/14/09

The supplier shall record and report cycle/operating life hours information for material specified in this purchase order. The supplier shall ensure that material specified as critical in this sense shall have its total non-operating life, operating life, and/or operational cycles recorded, as applicable. Such recording, as applicable, shall start at the time of final fabrication or assembly.

Supplier Deliverable: Supplier must provide the number of cycles/operating life hours/non-operating life hours that the component has been exposed to at the time the component is delivered to Aerojet, OR this information must be evident in the component documentation shipped to Aerojet with the parts specified in this purchase order.

Rev	Date	Description of Change	Changed By

This document is an integral part of the contract (purchase order) in which referenced. **Applicable Revision:** The revision in effect at the time the purchase order is placed.
